21ST CENTURY COMPUTERS

APPLY TODAY TO BE A DATA SCIENTIST!

Who are we?

21st Century Computers is a new computer start up business that is driven to develop the best computers of this century for business employees and students in schools. Working with us will hardly feel like work when you're helping the world! At 21st Century Computers, we will provide a modern work environment as well as all the tools needed to develop proper computers and software to help you succeed.

What will I do?

As a Data Scientist at 21st Century Computers, you will analyze through a range of sources to unlock valuable information that will influence business decisions to give advantages in competition.

How will I help?

At 21st Century Computers, we've had some issues recently with the competition and advancing ahead. Our start up has been losing lots of business and we need to track how our products are being used and what changes we need to make to improve. We need to get this information, analyze it, and implement change quickly. That's why we want you!

Salary

Your starting salary will be around $93K per year and $47.69 per hour!

Education

An Undergraduate Degree in analytical concentration is required and a Master's Degree is highly preferred!

Training

- Microsoft Certified Solutions Associate (MCSA)
- Microsoft Certified Solution Expert (MSCE)
- Oracle Database 11g Administrator Certified Associate

Special Requirements

- Good work ethic
- Outstanding time management
- Excellent understanding of machine learning techniques
- Great communication
